Replace the fuse if necessary and test your dashboard lights. Take the blown fuse to the auto parts store and select a replacement of the same type and amperage rating. This information is printed on the fuse itself, and fuses are also numbered and color-coded to make this easier.

### 3 Ways to Fix Dashboard Lights That Won't Light - wikiHow

Replace You Cars Instrument Panel Lights With LEDs.: The bulbs behind my Tachometer burned out a while ago and I decided I would replace them with LEDs. I also replaced the ones behind the speedometer as well. Overall I probably spent more on this project than normal, but I bought a few miscellaneous ...

### Replace You Cars Instrument Panel Lights With LEDs. : 8 ...

If your replacement bulb has a square or flat end, simply pinch the old bulb and pull it out of the socket. Daub a little grease on the outside of the round end of the replacement bulb; if it is square or flat, daub some grease on the connectors in the end. This will help keep out moisture and corrosion, and make any future bulb changes easy.

### How to Replace Light Bulbs in a Dashboard | It Still Runs

You will have either 11 or five bulbs to change, depending on the year of your truck. Give each bulb a quarter turn counter clockwise, and it will pop out. Simply replace them with the new LEDs, and plug the cluster back in. Unlike standard bulbs, LEDs are polarized: that is, they will only work if the + and - are oriented the correct way.
