The Dancing Plague The Strange

In Strasbourg in 1518, a dance craze began that, far from being a mere fashion, was a form of hysteria in which people literally danced themselves to death. The plague began on July 14, 1518, when Frau Troffea stepped into the streets of Strasbourg and danced madly for hours despite extreme exhaustion and swollen, bleeding feet.

Dancing plague of 1518, event in which hundreds of citizens of Strasbourg (then a free city within the Holy Roman Empire, now in France) danced uncontrollably and apparently unwillingly for days on end; the mania lasted for about two months before ending as mysteriously as it began.

dancing plague of 1518 | Facts & Theories | Britannica

The dancing plague (or dance epidemic) of 1518 was a case of dancing mania that occurred in Strasbourg, Alsace (now modern-day France), in the Holy Roman Empire in July 1518. Somewhere between 50 and 400 people took to dancing for days.

Dancing plague of 1518 - Wikipedia

The Dancing Plague is often regarded as one of the weirdest outbreaks of mass hysteria ever recorded. It began on 14th July 1518, when a woman, a Frau Troffea (or Trauffea) suddenly began to dance frenziedly in a street in Strasbourg. She kept this up, ignoring her husband's pleas to stop, until she collapsed from exhaustion.

THE DANCING PLAGUE | sjhstrangetales

Though the historical record of the dancing plague (also known as "dancing mania") is often spotty, surviving reports give us a window into this unusual epidemic. After the dancing plague commenced with Frau Troffea's fervent-yet-joyless marathon of movement, her body eventually succumbed to severe exhaustion that left her in a deep sleep.
